

ECORAIN™ TANK SYSTEMS CASE STUDY

Ecovoid HD Pavers

Residential Driveway near Trenton, IL

Stuber Land Design selected Ecovoid HD 2” Cell Turf/Gravel Pavers for a residential driveway that has a slight slope. By using Ecovoid Pavers, tire weight is supported, thereby keeping the grass and soil in place—no divots, ruts, or compaction. Tires grip the Pavers making it easy to drive up and down the slope.

- Installation May 2010
- 465 square feet of ET-1401 EcoVoid HD 2” Cells protect the grass with no divots from wheels.
- Installed in an area that receives occasional snow.
- EcoVoid HD 2” Cells have an AASHTO H25 Load Rating.
- Tom Schafer of Stuber Land Design designed and installed the turf driveway.
